Preface to 2023-24 BM214 Workshop 3: Enumeration of Bacteria and Bacteriophage

Welcome to the BM214 (Being a Biomolecular Scientist 2) workshop on enumeration of bacteria and bacteriophage, for 2023-24.

This year is the first presentation of the workshop material in this format, and we would be very grateful to hear feedback [by email](#) or through the [GitHub repository Issues page](#).

Overview

[FILL TEXT HERE]

Important Note

There is new material in this workshop that is not covered in lectures, and this material is examinable. Please take care to reach the text in the expandable callout boxes, as well as that for the workshop activities, to be sure you have understood the topic and obtain full value from the exercises.

Learning Objectives

By the end of this workshop, students will be able to:

- [FILL TEXT HERE]

Assessment

The workshop is not formally assessed although, as noted, all the material contained in the workshop is examinable. [FILL TEXT HERE]

1 Introduction

2 Summary

In summary, this book has no content whatsoever.
